WILL THERE BE A STEEL STRIKE?

Not If the CIO Abides By Its Pledged Word, Given Only Last Spring

QUESTION: What would be the general effect on the country of a steel strike?

ANSWER: Over 40 per cent of all the factory workers in the country earn their living by making steel into useful products for American life. A shut-down of the steel industry would be a disastrous blow to reconversion and would cause a serious loss in both wages and industrial production at a time when they

QUESTION: Is it true that the Steelworkers Union has pledged itself not to strike?

ANSWER: Yes. Every contract which the Union has signed this year with the various steel companies has a clause wherein the Union agrees not to strike during the life of the contract.

QUESTION: Are those contracts still in effect? ANSWER. Yes. They were signed in the spring of 1945 to run until October, 1946.

QUESTION: Who signed for the Union? ANSWER: Its international officials - Philip Murray Van Bittner, Clinton Golden and others-and the local Union heads at the various plants.

QUESTION: Is there no "escape clause" by which either side could end the agreements?

ANSWER: No. The Union demanded a fixed, long-term contract and got it.

QUESTION: Why did they want a long-term contract? ANSWER: In the Union's own words before the War Labor Board, "The Union's request for a termination date of October, 1946, is not made capriciously or

pressed here for bargaining purposes. It represents the considered view of the Union that only such a term

will adequately serve the needs of stability.' QUESTION: Did the recent strike vote violate the con-

ANSWER: No. Only an actual strike would violate them. QUESTION: Haven't there been strikes already during

the life of the contracts? ANSWER: Yes. There were 998 strikes in steel plants during the past year alone. They were mostly local strikes which the Union characterizes as "wildcat," but they meant a big loss in production.

QUESTION: Does the end of the war justify changing

ANSWER: No. The bond was sealed on both sides and should be kep: whether times be good or bad. The steel companies are continuing to live up to these agreements. If a strike is called, it will be in clear violation of existing contracts.

* * * * * * * * A STRIKE IN THE FACE OF EXISTING CONTRACTS WOULD SHATTER ANY CONFIDENCE IN THE VALID-ITY OF UNION AGREEMENTS IN THE STEEL
